Write a C++ program to implement Dijkstra's Single Source Shortest Path Algorithm for a graph represented using an adjacency matrix.

Number of vertices: 5

Edges:

0 1 4

0 2 8

1 4 6

2 3 2

3 4 10

Source vertex: 0

Code:

```
#include <iostream>
#include <vector>
#include <queue>
#include <climits>
using namespace std;
vector<vector<vector<int>>> constructAdj(vector<vector<int>> &edges, int V)
{
    vector<vector<vector<int>>> adj(V);
    for (const auto &edge : edges)
    {
        int u = edge[0];
        int v = edge[1];
```

```

int wt = edge[2];
adj[u].push_back({v, wt});
adj[v].push_back({u, wt});
}
return adj;
}

vector<int> dijkstra(int V, vector<vector<int>> &edges, int src)
{
    vector<vector<vector<int>>> adj = constructAdj(edges, V);
    priority_queue<vector<int>, vector<vector<int>>, greater<vector<int>>>
pq;
    vector<int> dist(V, INT_MAX);
    pq.push({0, src});
    dist[src] = 0;

    while (!pq.empty())
    {
        int u = pq.top()[1];
        pq.pop();
        for (auto x : adj[u])
        {
            int v = x[0];
            int weight = x[1];
            if (dist[v] > dist[u] + weight)
            {
                dist[v] = dist[u] + weight;
                pq.push({dist[v], v});
            }
        }
    }
    return dist;
}

```

```
int main()
{
    int V = 5;
    int src = 0;
    vector<vector<int>> edges = {{0, 1, 4}, {0, 2, 8}, {1, 4, 6}, {2, 3, 2}, {3, 4,
10}};
    vector<int> result = dijkstra(V, edges, src);
    for (int dist : result)
        cout << dist << " ";
    return 0;
}
```

OUTPUT:

The screenshot shows the Dev-C++ IDE interface. The code editor window displays the C++ code for Dijkstra's algorithm. The output window shows the execution results: "0 4 8 10 18", followed by a message indicating the process exited after 0.3469 seconds with a return value of 0, and a prompt to press any key to continue. Below the output window, the status bar shows compilation details: "Output: Filename: C:\Users\HP\Desktop\Mtech\OSCN\LAB_01_dijkstra.exe", "Output Size: 1.95564651469258 MIB", and "Compilation Time: 0.80s". The system tray at the bottom indicates a weather of 30°C and partly sunny, along with other system icons.
